

Special Design

Specially designed lighting poles are GM Poles pride and joy. These are our favourite projects to do as we can utilise our Australian engineering capabilities. At GM Poles we are not restricted to the products contained in a catalogue. We can design custom architectural or functional poles to meet the specific needs on your project.

Architectural

Our architectural projects have either fulfilled a consultants design brief or been a collaborative effort between GM Poles and our customer. If you have a design in mind or are looking for something different, let GM Poles help your dreams come true. Every product supplied by GM Poles is designed and certified by an Australian Registered Engineer

GM Poles also offers:

- Foundation Cages/Bolts
- Engineer certified foundation design
- Installation of footing
- Erection of pole
